SUMMARY

Computer Science student with a strong interest in software development, AI, and innovative projects. Passionate about building practical applications through hackathons and academic work.

WORK EXPERIENCE

Team Lead & Vendor Coordinator — **DesiCrew Solutions Pvt. Ltd.** Jan 2024 – Present
Managed a team of AI Data Annotators, assigned daily tasks, monitored quality and productivity, and coordinated with DesiCrew project managers to ensure timely delivery of AI data annotation and transcription review projects.

EDUCATION

2023 - Present	B.Tech in Computer Science at NIST University	(Pursuing)
2022	Class 12th (Intermediate)	(68%)
2021	Class 10th (Matriculation)	(80.3%)

PROJECTS

AI-Enabled Urban Air Mobility Management System *CSIR-NAL Internship*
Developed an AI-powered Urban Air Mobility simulation platform using Python, FastAPI, React, OpenCV, YOLOv8 and Random Forest. Implemented autonomous flight control, collision avoidance, sensor fusion, weather monitoring and real-time flight tracking for eVTOL operations.

FarmQuest - Sustainable Farming Gamification [GitHub](#)
Developed a gamified platform that promotes sustainable farming through AI-powered crop guidance, weather insights, interactive learning modules and reward-based missions.

STEM Quest - Gamified Learning Platform [GitHub](#)
Designed a gamified STEM learning platform featuring quizzes, multilingual support, progress tracking and teacher dashboards for rural students.

Smart Attendance System [App](#)
Built a QR code-based attendance management system using Android, Firebase and GPS validation to automate attendance recording and reduce proxy attendance.

SKILLS

Programming	C, C++, Python, JAVA, HTML, CSS
Database Management	DBMS (Relational Databases), Firebase (Cloud Database)
Development Tools	GitHub, Android Studio
Design Tools	Canva for design and visual content
